Dear Cordie + Todd -

I know you as thoughtful, caring, kind & sincere folks. That being so, I believe that you will make great parents even more so because of your professions and professional passions.

As architects, your concern & stewardship for the built environment shows through your interests in aesthetics, functionality & sustainability. I see this as profoundly translating into care & concern for humanity in general and in the specific. I see this as a desire to nurture a new generation and give your love & ethos to your children.

With all my heart, Ruth Ann (Decatur, GA)
